Aflatoxin Reference Guide

In order to qualify for the quality adjustments for aflatoxin, we must pull the samples, authorize an elevator to pull the sample, or authorize strips to pull samples from. Samples must be graded by an approved testing facility that is disinterested. Producers must pay for the test.

Test Result	20.1 ppb to 300.0 ppb	greater than 300.1 ppb
transported directly from the field and sold to a disinterested third party or transported directly from the field to commercial storage and sold prior to 60 days after the calendar date for the EOIP (must request extension in writing)	RIV	RIV
unsold prior to 60 days after the calendar date for the EOIP	.1 - 20.0 ppb = .000	claim cannot be settled until grain is fed, sold, or used
	20.1 - 50.0 ppb = .100	
	50.1 - 100.0 ppb = .200	
	100.1 - 200.0 ppb = .300	
	200.1 - 300.0 ppb = .400	
unsold after 60 days after the calendar date for the EOIP	.1 - 20.0 ppb = .000	claim cannot be settled until grain is fed, sold, or used
	20.1 - 50.0 ppb = .100	
	50.1 - 100.0 ppb = .200	
	100.1 - 200.0 ppb = .300	
	200.1 - 300.0 ppb = .400	
grain that was stored on the farm and sold to a disinterested 3rd party prior to 60 days after the calendar date for the EOIP	.1 - 20.0 ppb = .000	0.5
	20.1 - 50.0 ppb = .100	
	50.1 - 100.0 ppb = .200	
	100.1 - 200.0 ppb = .300	
	200.1 - 300.0 ppb = .400	
grain that was fed, utilized in any other manner, or was sold to other than a disinterested third party	.1 - 20.0 ppb = .000	0.5
	20.1 - 50.0 ppb = .100	
	50.1 - 100.0 ppb = .200	
	100.1 - 200.0 ppb = .300	
	200.1 - 300.0 ppb = .400	
grain that has no value, if destroyed in an acceptable manner	1	1
grain that has no value and was not destroyed in an acceptable manner	0	0
