“What a huge success. Thanks for all of your help. I feel a little guilty about my “lack” of work in this process.”

~ Adele Meyer, Agent

Precision Farming

Report Production or Acreage in 3 easy steps.

Reporting Made Simple!

Production or Acreage Reports in 3 easy steps.

Save time and money with QBE NAU Precision Farming.

Technology plays an important role in farming with the use of GPS enabled planting and yield monitors. To provide excellent service to our agents and insureds, we continually strive to make the use of Precision Ag yield and planting data more user-friendly and intuitive.

Step 1

Upload your yield and planting monitor files to our Precision Farming Dashboard.

- As an Agent, go to www.naucountry.com, click the Login button, then select Agent Portal.
- As an Insured, go to www.naucountry.com, click the Login button, then select Policyholder Portal.
 - If you are new to the Policyholder Portal follow the Register Now link.
- Before upload, the planting and harvest files need to be exported and compressed into a zipped folder.
- You can check the status of uploaded files at any time.

Step 2

Request a report.

- The report function will allow the attachment of the precision farming file to a specific policy.
 - The agent will be notified from an automatic email when a report is requested by an insured.
- Once the processing has completed, the Production Report or Acreage Reporting documents are available to be printed from EASYwriter Pro by the agent.

Step 3

Sign and return report.

- When the requested report is printed from EASYwriter Pro, it can be reviewed, signed by the insured and agent and submitted back to QBE NAU.
