You can manage all Templates by clicking your username in the upper right corner of the screen and choosing the "Estimate Templates" tab. Select the policy type "MPowerD" from the list, then you will see all your templates listed. From the list you can tag a new "Default Template" by clicking the star on the right, or delete previous templates you no longer need in your drop down list, by clicking the "X" on the left.

Once templates are set up for various crops, counties, coverage levels, etc., you will have one click quoting available for the rest of the 2019 season.

Note: Alternative Price Discovery Intervals selected do not get saved as part of the template creation process. You will have to select desired Intervals to include with the estimate you are creating each time you use a template.
