

RPowerD™ - Historical RP and RPowerD indemnity results

May 17, 2018

If we agree the only thing in farming that guarantees the producer money are their crop insurance revenue policies then the next questions are:

1. What are my minimum crop insurance revenue goals?
2. What Price and Coverage Level are required to achieve my minimum crop insurance revenue goals?
3. What is my risk of waiting until projected price is set to establish minimum crop insurance revenue?
4. How have the policies I'm considering contributed to my achieving my minimum revenue goal?

The updated tools in www.AgenteVantage.com give the agent an easy venue to ask these questions and deliver answers.

Price Movement Calculator

State: Illinois, County: Jersey, Crop: Corn, Type: Grain

Use Market Price: Market Price \$4.1650, Opt-In: Yes

Your estimate of the highest possible Alternative Price Discovery Period Price: \$4.40
