

**RPowerD™ - Special 90-day Alternative Price Discovery Periods available**

**January 31, 2019**

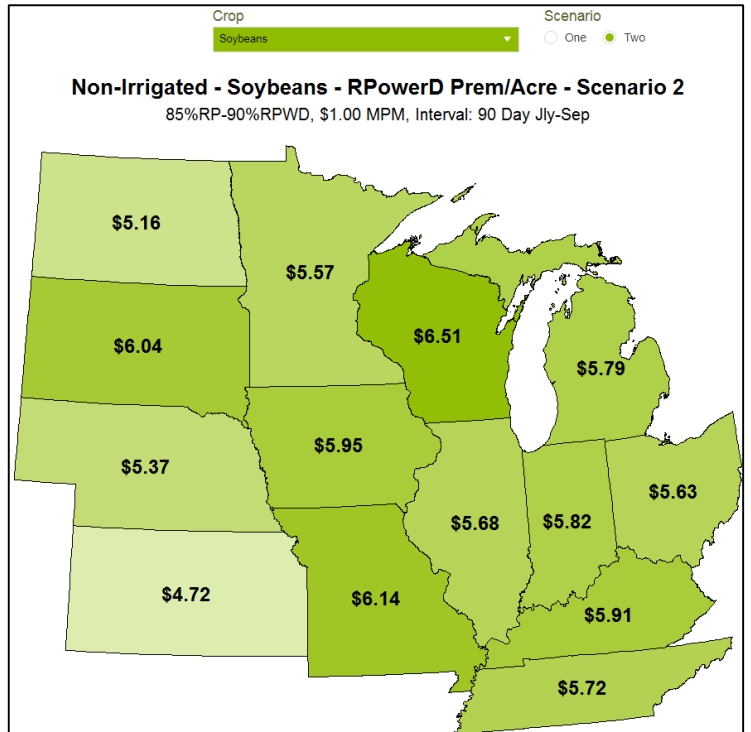

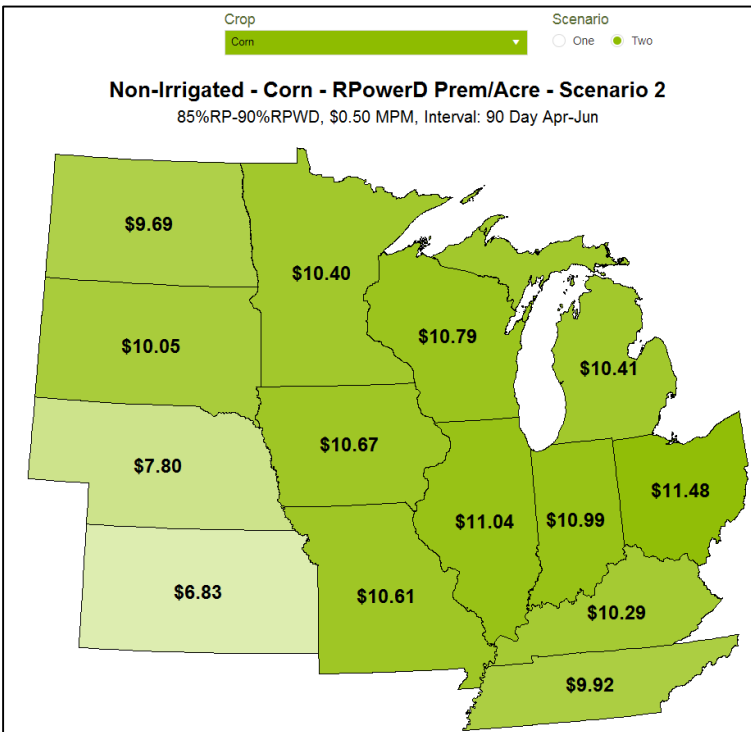

View premiums for the scenario covered in this edition of the Revenue Power Guide in Quick Maps, available from the welcome screen on [www.AgenteVantage.com](http://www.AgenteVantage.com).

Quick Maps show approximate producer premium on featured private product strategies for states & counties. If you see a strategy and rate that meet the needs of your producers, you can simply open the estimator and run a specific estimate for your customer, use the Sales Tools to show how the strategy has worked over time, and demonstrate how it will perform under any price/yield scenario in the Matrix.

New Special Price Discovery Period offerings are available for 90% and above RPowerD Coverage Levels. April-June and July-September 90-day interval packages are offered at a value price. RPowerD Revenue Trigger on this strategy is RPowerD Coverage Level x Interval Price (Highest of all intervals if more than one is chosen) x Approved Yield. Historical performance can be viewed in detail at the Special Price Discovery Period link in the RPowerD Estimator.

Scenario 2 in Agent eVantage Quick Maps run shows approximate RPowerD rates for producers who want opportunity to raise their minimum revenue trigger as the result of a growing season price rally with 90% coverage. We find the 90% coverage is meeting the Minimum Revenue Goals of many producers at a much lower premium than the 95% trigger coverage levels.
