

Sign Up for Hail Notifications

The Insured Hail Notification service sends an email notification if the probability of hail greater than 0.50" is detected within a buffered area of one mile around each field or section that exists on your policy. The email will contain your policy number, county, and crops potentially affected, and will provide a link to your policy within EASYview Weather. This notification gives you the opportunity to check on the potential damage and contact your agent in the case of a loss.
